1555 Palm Beach Lakes Boulevard, Suite 200  
West Palm Beach, Florida 33401

RE: *Annual Engineer's Report*

Dear Supervisors:

Please accept this letter as the annual engineer's report.

We continue to monitor Hendry County's progress on the Airport-Sears MSBU status for the District under the 2008 agreement. It is noted the South Florida Water Management District permit application was withdrawn and a new application was submitted on November 12, 2021.

As part of the FDEP BMAP BMP implementation for Barron, our office assists with Public Education and Outreach along with FDACS NOI coordination, when needed.

Section 403.9302, Florida Statutes requires counties, municipalities and special district to perform a 20 year needs analysis for wastewater and stormwater. This report is due to the County by June 30, 2022. The County is required to send the compiled reports to Department of Environmental Protection and the Office of Economic and Demographic Research (EDR) by July 31, 2022. The EDR must publish statewide evaluation by January 1, 2023. Our office is in the process of preparing the analysis, using the template provided from the State, for a timely submittal to Hendry County.

The structures referred to as the Knowles Camp crossing and the KT Grove structure in Section 18 have been replaced.

The SFWMD ROW staff contacted the District regarding a 60" culvert connecting to the SFWMD L-2W Canal. ROW staff suggested the culvert needs to be replaced. The culvert is located in Section 1, Township 45 S, Range 34 E. We are looking into the validity of this matter.

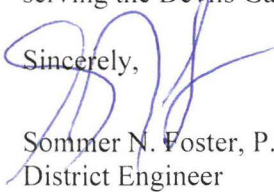

During September 2021, the District experienced heavy rainfall. The rainfall stressed the system and areas of weakness in the system were discovered. We recommend the District continue implementing the maintenance program.

The FWC contacted our office regarding a failed 48" culvert crossing into their lands in Section 24, Township 44 S, Range 30 E. FWC is requesting this culvert be replaced.

It is noted the largest land owner continues to sell lands within the District. Research associated with a sale revealed a constructed District works, known as the Tower Canal, was not covered by a District easement. A lico granted an easement to the District for this canal.

Should you have any questions followed the meeting, I can be reached at 863-983-9188. We look forward to serving the Devils Garden Water Control District in the future.

Sincerely,

  
Sommer N. Foster, P.E.  
District Engineer
